

Project

Synopsis

Topic : Marksheet Generator

ABSTRACT:

Marksheet Generator is one of a kind interlink between instructors and students, is the best cloud-based application with exceptional tools for college professors to make, store, pass-on and audit information, generate mark sheets and exams results of students online on the web. It has been moved toward the comparable back-end with innovative features and redesigns.

Key Features :

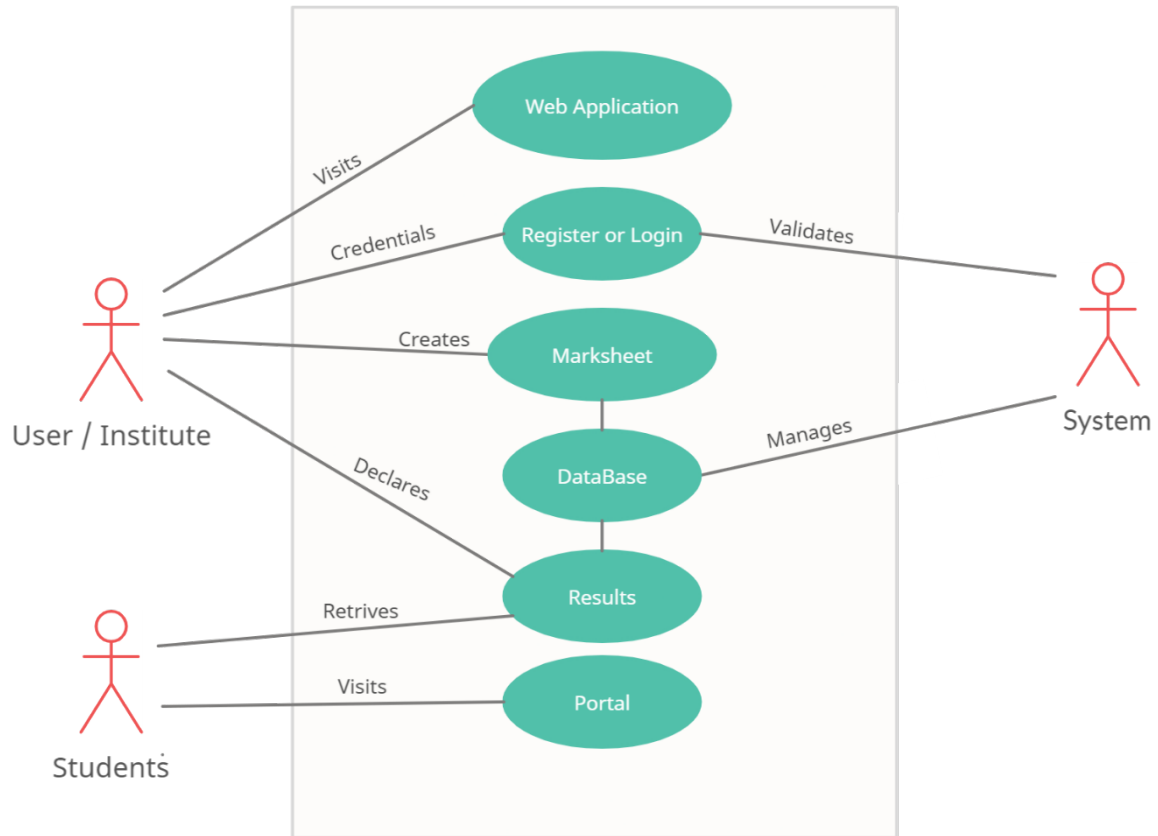

- Manual entry of scores/ grades of students
- Auto-calculate final and course grades
- Upload and download Gradebook as report in PDF and Excel formats
- Allows students to review grades by grading periods and assignment submission dates and details
- Cloud features helps in storing and recording data
- Quick and easy-to-use
- Quickly generate error free report cards
- Customizable predesigned report card templates

Advantages :-

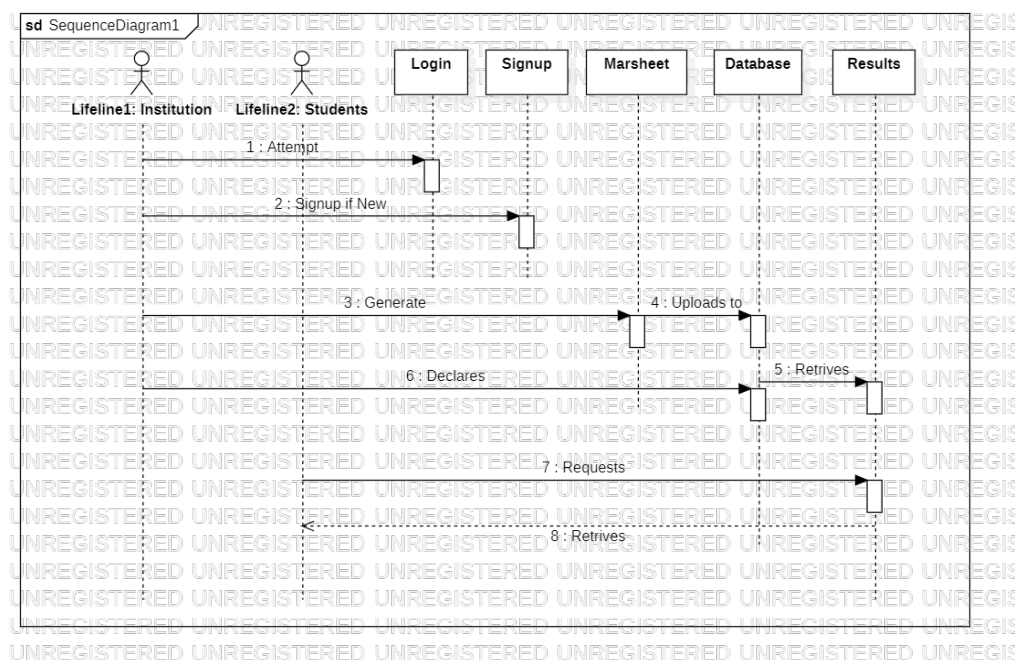

1. Calculate scores, percentages and grades.
2. Generate printouts of examination and test reports instantly.
3. Send/ publish results to parents and students online.
4. Record and search details of every exam/test, student wise/course wise.
5. With student result management system, teachers, professors, and staff can create result analysis reports.
6. Gradebook Management.
7. Records marks and result on a single database.

Application divided in Modules :-

1. Login/ Registration Module :-

- Login Page
- Registration Page
- Forgot password Page

2. Dashboard Module :-

- Create Marksheet Page
- Show All Marksheet Page
- Pending Results Page

3. Left side menu bar Module :-

- Settings
- Profile

Languages Using :-

- HTML
- CSS
- JAVASCRIPT
- PHP
- MySQL

Softwares Using :-

- Visual Studio Code
- MySQL
